

# Geography At The Movies

Free video resources for geography teachers

## Welcome!

GATM - Geography at the Movies is a non-profit making free site for teachers of geography to share their films.

**IMPORTANT NOTICE: If you are a long time browser of GATM you'll notice that many of the older movies from the archives have been removed by the hosts, Bliptv, because of copyright issues. For that reason you are strongly advised to download and save to your own computer any movie here that you'd like to keep.**

If you have a movie to share, please read our [Terms of Use](#) page first to avoid disappointment! The email to send them to is there. **Your sound and images must not break copyright rules!!**

Thanks to [Bliptv](#) for hosting the movies. You will have two options: to view the movies online as flash files or to download and run from your computer. Some schools have [Bliptv](#) filtered out so the latter might be your better option - and the quality will be improved too.
